IntelliZone2
IntelliZone2

Introducing IntelliZone®2, part of the next generation of equipment from WaterFurnace. The IntelliZone2 works in unison with our Aurora controls to provide the perfect temperature in up to six separate zones. When added to our 3 Series, 5 Series and 7 Series units, you’ll enjoy the highest level of home comfort and savings available today.

Now you can precisely regulate temperatures in multiple areas of your home using separate thermostats or sensors. Gone are the days of needing to endure a hot upstairs bedroom or being forced to heat a guest bedroom that’s only used during the holidays.

The IntelliZone2 gives you the power to condition where and when you choose. The result is the ultimate in comfort and cost savings. You’ve already chosen the finest heating and cooling system available; now choose the most advanced zoning system available to control it.

Features and Benefits

Made by WaterFurnace
IntelliZone2 was engineered by WaterFurnace to control WaterFurnace equipment. We’re the only geothermal company to offer our own residential zoning solution.

Engineered for Variable Capacity Technology
The world’s only geothermal zoning system that’s able to mate to variable speed compressors and was engineered to control the variable capacity technology used in our flagship 7 Series.

Interactive Touch-Screen Control
Unique among zoning systems, IntelliZone2 is controlled from a beautiful color touch-screen thermostat. Its 4.3” display can be customized with images like family photos.

Designed Around Aurora Controls
All the advanced features of our 5 and 7 Series heat pumps are fully supported including energy monitoring, plain-English error communication, SuperBoost™ cooling and Active Dehumidification.*

Energy Monitoring
Units with Aurora Advanced Controls provide support for precise energy monitoring. Gain insight by monitoring monthly, weekly or daily analysis of your unit’s energy usage.

1. IntelliZone2 24-volt compatible with non-AXB units
2. Exclusive to 7 Series
